

Scanhugger HT 35/30/2

The Scanhugger HT 35/30/2 is available with 2 cutting systems. One rotor system with a fast rotating chipping knife ideal for shredding slabs, edgings, and of-cuts. The second rotor system is mounted with cutting crowns for processing particleboard, MDF and plywood. The chipper can be placed in the factory at the source of waste operating in-line with a straight- or gang rib saw, it continuously reduces the waste produced and eliminates the handling of slabs and edgings.

INFEED SIZE

90 x 330mm

ROTOR SPEED

900 RPM

ROTOR DIAMETER

300 mm

MAIN MOTOR

22 - 37 kW

CHIP SIZE

5 - 25 mm

CAPACITY

400 - 1500 kg/h

WEIGHT

850 kg
